Contribution of antioxidant systems to the antioxidant activity of human breast milk. The role of antioxidant systems in the protective action of human breast milk against oxidative stress was evaluated in vitro. As established by a range of assay systems, human milk had no detectable superoxide dismutase and catalase activities, but it contained high

levels of glutathione peroxidase and thioredoxin reductase. When human milk was subjected to simulated gastrointestinal passage, the antioxidant enzyme activities that were readily measured in the retentate had decreased. Of the dietary antioxidants tested, only selenium in the form of selenate was detected in the retentate by an established assay. Although supplementation with small amounts of selenium did not alter

the antioxidant enzyme activities in the retentate, selenium did protect against the protein oxidation in the retentate. Although this would be due to the action of glutathione peroxidase, the direct antioxidant action of the selenium also cannot be excluded.Q: python read file on windows platform I have file in following format.I want to read file and one line per row. this is first line of file this is second line

Q: How do I translate "the wait of all/a life"? The wait of all/a life The wait of a life The wait of all life I've never encountered this and I have no idea how to look it up. I found the question How do I translate this structure? But does it work for wait of all/a life? A: My thoughts on this: The wait of all a life seems almost nonsensical to me. If you are referring to the wait of all life, you could say la vie aux

étrangers. In the case of la vie vs le temps (which is a form of « the wait of time »), we say vivre comme un chevalier d'industrie, à la vieille école. I.e. to live as a free man (with no rules), enjoying the good life, while sitting in a well-heated room. By analogy, you could then say la vie à la vieille école which is a very poor french translation of what I said above. It seems quite strange to me to say « vivre comme un chevalier

d'industrie », but then to translate « le temps » as « la vie ». Thus I would recommend using « la vie » instead of « le temps » here. Thus, « la vie aux étrangers » sounds more natural than « la vie à la vieille école ». I would not make the mistake of translating « la vie » as « le temps » when you are translating from French.
